INSTALLS

installation should be carried out in accordance with local standarts. Subfloor to be smooth, hard, clean and dry prior to laying. Where applicable the subfloor must incorporate an effective Damp Proof Membrane. The material must be allowed to acclimatize 24 hours before installation in a room temperature of between 18-24 C

MAINTENANCE

An emulsion dressing is required. Maintenance should be carried out regularly to retain the appearance and durability of the floor. The floorcovering should be maintained with regular sweeping and damp mopping using a neutral clenser, more intense cleaning should be carried out using a fine spray cleaning pad under a floor machine, or for larger areas combined machine clening.
