4TH GENERATION SUPER DELUXE COMPOSITE DECKING

EASY CLEAN FINISH

A co-extrusion composite that ensures easy cleaning and less hassle

FADE RESISTANT

UV-inhibitors prevent bleaching by the sun for a long-lasting colour

STRONG MATERIAL

Strong to the core, Super Deluxe series composite decking is your total solution

DUAL TONE COLOUR

Dual-tone colour add depth, texture and intrigue to your deck

4TH GENERATION SUPER DELUXE COMPOSITE DECKING

Our Super Deluxe Composite Decking Board is built using a co-extrusion process, with a durable shell protecting a dense composite core. This design ensures superior strength, weather resistance, and long-lasting durability, making it the perfect solution for outdoor flooring that with stands the elements. Beyond performance, the decking provides a highly authentic finish, giving outdoor spaces a premium, distinctive look. With minimal maintenance and exceptional longevity. Super Decking is an ideal choice for both residential and commercial projects that demand reliability and style.

4TH GENERATION SUPER DELUXE COMPOSITE DECKING

OUR-SIDED CAPPING

The four-sided capping on our Deluxe range serves as a robust protective barrier, safeguarding the inner core of the board from excessive fading and staining. This advanced capping technology ensures that the Deluxe board maintains its premium finish and color, even under harsh outdoor conditions.

REVERSIBLE AND VERSATILE

Unlike many other capped composite boards, the Deluxe range features a full 360-degree capping that wraps around the entire board. This design not only provides superior protection from the elements but also offers the added benefit of a reversible color option. You can easily choose between grooves or woodgrain textures, giving you greater flexibility and style choices for your outdoor space.

DUAL-TONE AUTHENTICITY

With its two-tone color variation and authentic wood-like finish, the Super Deluxe board offers striking visual appeal that enhances any outdoor setting. The finish is meticulously engineered to replicate the natural texture and distinct aesthetic of timber, providing a realistic, high-quality look that complements a variety of design styles.

COLOUR CODE:

NOTE:- STUDIO PHOTOGRAPHY AND/OR YOUR BROWSING DEVICE MAY NOT GIVE AN ACCURATE REPRESENTATION OF COLOURS.

VERY LOW MAINTENANCE
All our boards are hard-wearing and easy to maintain.

NO ROTTING OR WARPING
A unique material composition resistant to the damaging effects of moisture build-up.

STRENGTH AND DURABILITY
Unlike timber, our boards retain their strength and durability throughout their life.

ECO-FRIENDLY
A long-lasting material composed of a blend of recycled plastic and wood fibres.

NO TREATMENT REQUIRED
No need to paint, oil, stain or seal the deck boards.

NO SPLINTERING
The material composition ensures long-term safety and assurance.

Super Deluxe Composite Decking Board combines the timeless beauty of natural wood with the durability and low-maintenance benefits of advanced composite technology. Featuring a highly resilient, stain-resistant capping, this product is engineered for exceptional performance in even the harshest outdoor environments. Its low water absorption rate ensures outstanding resistance to moisture, while high UV resistance helps preserve the board's authentic finish over time. Ideal for both residential and commercial applications, Super Deluxe Composite Decking offers long-term value with minimal upkeep. The board's premium design delivers a sophisticated aesthetic while offering superior protection against the elements, reducing the need for ongoing maintenance and ensuring lasting beauty year after year.

4TH GENERATION SUPER DELUXE COMPOSITE DECKING

Explore our Super Deluxe composite decking, available in six popular colors: Sandy Brown, Teak, Rose Wood, Reddish Brown, Dark Coffee and Light Grey.

Our composite decking boards are more durable and longer-lasting than traditional wood. They require minimal maintenance, no painting or staining needed. Crafted from an advanced blend of wood fibers and plastic, these boards provide a natural look and feel underfoot while resisting common issues like warping, mold, insect damage, and rot.

Experience the ideal mix of durability, style, and hassle-free upkeep with our Super Deluxe composite decking boards.

WHAT MAKES CARPET PRIMA A LEADING COMPOSITE DECKING SUPPLIER?

Carpet Prima is a composite decking supplier founded on the belief that superior product quality doesn't have to come with a premium price tag. This commitment has driven our success since the early days, when we supplied unbranded composite decking solutions to builders' merchants. Six years and thousands of decking boards later, our composite decking brand was born one that delivers genuine value by offering high-quality products at a reasonable price.

Today, our company is powered by a dedicated team of problem-solvers passionate about helping customers find the best products for their needs. Here's a closer look at the commitments we make to ensure your satisfaction.

COMPOSITE DECKING DIRECT FROM OUR DOOR TO YOURS

- 1** We offer same-day express delivery, even during peak times, ensuring you receive your decking when you need it.
- 2** Our knowledgeable team of problem solvers is here to guide you through your decision, ensuring you choose the best product for your needs.
- 3** By stocking a deliberately small product range, we keep things simple and ensure the highest possible product quality.
- 4** We pride ourselves on exceptional communication and service, offering free decking samples to help you make an informed choice.
- 5** As a composite decking retailer, we make it easy for consumers to buy decking online, directly from us, or over the phone.
- 6** As a composite decking wholesaler, we offer competitive discounts for bulk purchases, supporting businesses with cost-effective solutions.

COMPOSITE DECKING DISTRIBUTOR FOCUSED ON PURE QUALITY

As a dedicated composite decking distributor, we apply our expertise to ensure that every board meets the highest quality standards. With meticulous attention to detail, we consistently aim to exceed our customers' high expectations.

This commitment is further backed by our promise of delivering long-lasting, high-quality products. We offer a 30-year residential warranty and a 15-year commercial warranty, showcasing our dedication to quality. Now, that's a true mark of a composite decking distributor's commitment to excellence.

APPLYING A DESIGN-LED APPROACH

We are committed to continuously improving not only the performance of our products but also their appearance. The depth, texture, and authenticity of the wood grain finish on our boards are areas we tirelessly work to perfect.

In fact, we view it as our responsibility to challenge the common misconception that all composite decking has a plastic, shiny finish that detracts from its aesthetic appeal. Our boards are a far cry from the artificial feel and printed finishes typically found in many other composite options.

A COMPOSITE DECKING BRAND THAT OFFERS GREAT VALUE

We focus on delivering quality, choice, and value, using our knowledge of the latest trends in composite decking. Our goal is to offer you the best decking to improve your outdoor space without breaking the bank. We believe in providing great products without high prices or poor customer

4TH GENERATION SUPER DELUXE COMPOSITE DECKING VS WOOD

WHAT IS COMPOSITE DECKING?

Composite decking is an advanced outdoor flooring solution engineered to offer superior resistance to the damaging effects of weathering. Made from a specialized blend of wood fibers and recycled plastics, this innovative product provides enhanced durability and longevity compared to traditional timber decking, effectively addressing common issues such as rotting, splintering, warping, and fading.

When evaluating decking options for your project, while the aesthetic appeal of timber is widely recognized, there is a compelling case for considering a high-performance alternative that delivers both cost-efficiency and long-term value. Super Deluxe Composite Decking combines advanced material technology with a refined finish, offering the perfect balance of authenticity and durability. This innovative solution minimizes maintenance requirements, ensuring superior performance and maximizing the return on your investment.

ADVANTAGES OF SUPER DELUXE COMPOSITE DECKING VS WOOD

A LONG-LIFE DECKING ALTERNATIVE TO TIMBER

With a 30-year warranty across the entire product range, our high-performance composite decking is engineered for superior longevity and reliability. The innovative blend of wood fibers and recycled plastics significantly enhances resistance to the common issues that compromise traditional timber decking. While timber, even with regular treatment, is prone to moisture-related damage and eventual deterioration, Super Deluxe Composite Decking offers a more resilient and dependable solution. It delivers consistent, year-round performance, ensuring long-term value and minimal maintenance for your investment.

EASY-CARE, HIGH QUALITY DECKING

Timber decking often entails significant maintenance efforts and is susceptible to issues such as warping, rotting, cracking, and splintering due to weather exposure. By choosing composite decking, you can avoid the recurring costs of sealants, paints, and oils, as well as the time-consuming upkeep. With advanced moisture resistance and superior durability, our composite decking offers a long-lasting, hassle-free alternative that requires minimal maintenance. This not only saves you time and money but also ensures a high-performing outdoor space that continues to deliver value year after year.

OFFERING LONG-TERM SAFETY AND ASSURANCE

Timber decking often presents significant safety challenges, with issues like rot, moisture buildup, and the growth of moss and algae weakening the structure and creating hazardous conditions. These factors can lead to instability, splinters, and potential accidents. In contrast, our composite decking offers a reliable solution, combining superior slip resistance with long-term structural integrity. The advanced design and material composition of our boards ensure they outperform traditional wood alternatives, providing lasting durability and enhanced safety for your outdoor space. With our composite decking, you can confidently invest in a product that delivers both performance and peace of mind for years to come.

YOUR WALLET WILL THANK YOU IN THE LONG RUN

While timber decking may seem like the more cost-effective option upfront, the long-term financial implications are often underestimated. The ongoing maintenance required to counteract the effects of weathering such as stripping, painting, and oiling can quickly become a significant expense, eroding any initial savings. Today's discerning customers recognize the value of a smarter investment. By choosing composite decking, you not only reduce maintenance costs but also secure a more durable, low-maintenance solution that delivers long-term value, ensuring a better return on your investment over the life of your deck.

COMPOSITE OFFERS DISTINCT LOOKS THAT LAST

While the natural beauty of timber has long made it a popular choice for outdoor flooring, the reality is that its appearance deteriorates over time without constant maintenance. Cracks, fading, blackening, and splinters are inevitable, leaving your once-beautiful timber deck looking worn and neglected. Our composite deck boards are specifically designed to replicate the aesthetic appeal of timber, but with superior engineering that ensures these looks endure. Even after years of exposure to the elements, our boards retain their beauty, providing a lasting, low-maintenance solution that continues to enhance your outdoor space for years to come.

THE BENEFITS OF SUPER DELUXE COMPOSITE DECKING

No Algae Growth

No Rotting

No Structural Weakness

No Cracking Or Splintering

No Warping

No Painting Or Staining

No Blackened Decking

No Treating Or Oiling

No Insect Damage

No Excessive Fading

No Water Damage

No Excessive Shrinking

SUPER DELUXE COMPOSITE DECKING PRODUCT FEATURES EXPLAINED

Our Super Deluxe composite decking is designed with features that ensure both safety and peace of mind.

A good composite decking product transforms any outdoor space with an authentic, contemporary finish. It also offers a range of features that ensure safety and peace of mind for years, allowing you to fully enjoy your deck area without worry.

In this section, we've broken down our entire product range and highlighted their key features. Our goal is to inform you about what sets our products apart, helping you choose the perfect option for your project.

MAINTAINANT FREE

OPT FOR A LITTLE-TO-NO MAINTENANCE DECKING SOLUTION.

Choose a low-maintenance decking solution that lets you enjoy your outdoor space without the constant upkeep. Traditional decking can face a range of weather challenges whether it's months of rain, snow, and moisture buildup, or intense summer heat that dries out the boards. A high-quality decking solution needs to withstand all these elements without requiring regular maintenance. With our Super Deluxe Composite Decking Board, you can eliminate the hassle of ongoing care. Designed to resist weathering and staining, it ensures that your outdoor area remains beautiful and functional with minimal effort. Say goodbye to frequent repairs, sealing, and cleaning giving you more time to enjoy your space, and less time spent maintaining it.

MINIMAL MAINTENANCE, MAXIMUM PERFORMANCE

Super Deluxe Composite Decking Boards offer an almost maintenance-free solution, requiring just minimal care twice a year. The unique wood-plastic blend makes the boards highly resistant to moisture, which is a common issue with traditional timber decking. The moisture-resistant seal helps prevent problems like warping, rotting, and discoloration, ensuring long-lasting durability.

We recommend a simple cleaning twice a year with domestic-grade soap, warm water, and a soft brush. This will help maintain the boards' appearance and prevent debris buildup that can affect performance. For a low-maintenance, high-performance decking solution, Super Deluxe Composite Decking is ideal for both residential and commercial use.

FOR A DEEPER CLEAN

While regular maintenance with soap, water, and a soft brush is typically sufficient, we recognize that certain environments may require additional care. If your decking is exposed to heavy leaf fall or frequent spills, using a water-based composite cleaner can provide a deeper clean, effectively removing stubborn stains and debris while maintaining the decking's performance and appearance. Our Super Deluxe Composite Decking is engineered to endure the elements, but occasional deep cleaning can help preserve its aesthetic and ensure long-lasting durability.

SOME MORE MAINTENANCE TIPS

Follow the tips below to make sure you properly care your low maintenance decking:

- ✔ Remove residue between boards to avoid build-up
- ✔ Do not Stain the boards
- ✔ Sweep excess material from the surface
- ✔ Act quickly when spill occur
- ✔ Avoid using rubber-back rugs
- ✔ Incorporate drainage to your subframe
- ✔ Ensure sufficient air flow beneath your decking

THE HIGH MAINTENANCE ALTERNATIVES

Where our composite board come with a gurantee of next-to-no maintenance, high-maintainance alternatives such as timber decking come with the gurantee of tiresome upkeep.

Timber

Timber comes with the promise of backing upkeep and maintenance, year-after-year. And event that is not enough to prevent the inevitable cracking, splitting and warping of your deck board over time.

EASY TO INSTALL

EASY TO INSTALL DECKING THAT'S HASSLE FREE

Installing Super Deluxe Composite Decking is quick and hassle-free. Our decking boards and fixings are designed for easy installation, whether you have an existing timber subframe or need a full decking and subframe kit. We also provide helpful tips and resources to guide you through the installation process

A COMPOSITE DECKING CLIP SYSTEM THAT KEEPS THINGS SIMPLE

Our FastClip products are engineered to seamlessly integrate with composite decking boards, providing a secure, long-lasting, and discreet fastening solution. By eliminating the need for visible face-fastening (screws), the FastClip system simplifies installation, using clips that securely attach to the subframe, to which the decking boards are then fixed.

BENEFIT OF USING OUR FASTCLIP SYSTEM

QUICK AND EFFICIENT INSTALLATION

True to its name, the FastClip system delivers an installation process as fast as traditional screwing methods. The clips are designed for effortless assembly, allowing the boards to simply click into place, saving time and reducing labor costs

PURPOSE-BUILT DESIGN

FastClips are designed to create the right gap between boards, allowing for expansion and proper drainage, which helps prevent warping and ensures the decking performs well over time.

EFFORTLESS BOARD REMOVAL

The FastClip system enables easy removal of boards without the risk of damage, offering a convenient solution for maintenance or adjustments, unlike traditional timber boards.

RETAIN YOUR WARRANTY

Designed to work seamlessly with our decking boards, using FastClip fastening clips ensures that you maintain eligibility for our industry-leading warranty.

ADDITIONAL FEATURES FOR EFFORTLESS

EASY-CUT COMPOSITE DECKING

A common misconception is that composite decking is difficult to cut, making installation more time-consuming and challenging. In reality, our composite deck boards cut just like timber. You can use the same woodworking tools that you would with wood decking, allowing for a smooth and straightforward cutting process.

EASY INSTALLATION OF FINISHING TOUCHES

Once your final board is in place, completing the installation is a breeze with our trim options. Simply secure the trims by screwing through the face into the board or subframe. For added stability, a secondary method of gluing the inside of the trims can be used to provide extra hold, ensuring a clean and professional finish.

WOOD EFFECT COMPOSITE DECKING

INTRODUCING A PREMIUM WOODGRAIN FINISH THAT OFFERS UNRIVALLED AUTHENTICITY

We believe that to outshine timber, our decking should match its beauty. That's why we focus on perfecting the woodgrain finish to create the most realistic look possible. Explore our range and see why our wood-effect composite decking is the best in class, offering superior quality and appearance compared to alternatives.

AN EMBOSSED FINISH OVER A PRINTED WOOD-EFFECT DECK

With our embossed woodgrain composite decking, we've eliminated the flat, plastic-like finishes that have often been associated with traditional composite products. By replicating the depth and texture of natural timber's grain, our entire range features a sophisticated "3D woodgrain" finish that stands out for its realism and durability.

Unlike many other manufacturers who simply print a wood-effect pattern onto the surface, our advanced manufacturing process etches the design into the board. This ensures that the texture remains sharp and defined over time, avoiding the fading and loss of detail that can occur with printed finishes. The result is a decking that maintains its authentic look and feel for years to come.

SUPER DELUXE SERIES OFFER A BICOLOR APPEARANCE

The Super Deluxe Series mimics the rich, multi-tonal colors of natural timber. Our capped composite boards feature a bicolor design, with color variations along the length of the boards to replicate the natural inconsistencies found in real wood. This unique design adds depth and character, giving your outdoor space a more authentic and refined look.

A WOOD GRAIN COMPOSITE DECKING FINISH THAT STANDS THE TEST OF TIME

Timber decking often requires extensive maintenance to preserve its appearance, as the effects of the seasons can quickly cause it to fade and deteriorate. Our composite decking range, however, is designed for long-lasting beauty with minimal upkeep. Featuring advanced capped shell technology, our Deluxe Boards provide exceptional UV fade resistance, ensuring the rich, vibrant color remains intact even after years of sun exposure. Experience a durable, low-maintenance solution that maintains its aesthetic appeal over time.

DELUXE

Our entire range of composite decking is designed to offer customers ultimate flexibility, allowing you to choose the best solution for your specific project. This versatility is a key feature that sets each product apart. We believe that the decision between options should be guided by three main factors: appearance, slip resistance, and maintenance. It's important to consider all three to ensure the decking you choose meets both your aesthetic and practical needs before installation.

APPEARANCE

Choosing between the brushed tiny lines and woodgrain finish comes down to personal preference. Our woodgrain finish offers exceptional texture, depth, and realism, which sets it apart from other decking options. It's often hard to achieve this level of detail with timber alternatives, especially considering slip resistance, making it a popular choice for many.

On the other hand, the brushed tiny lines finish provides a more uniform, modern look that is perfect for those who want a sleek, contemporary finish with the timeless appeal of traditional timber.

ANTI-SLIP FINISH

A key feature of our deck boards is their high slip-resistance rating. The engineered design of our products allows us to refine and optimize the surface textures to ensure a safe, slip-resistant surface. As each composite decking range offers different finishes, the anti-slip ratings can vary slightly between boards.

For example, the grooved-channel finish provides superior slip resistance compared to the woodgrain finish. The deep grooves offer better traction, making it a great choice for projects where safety is a primary concern. If slip resistance is a priority for your outdoor space, we recommend choosing the grooved option for optimal performance.

MAINTENANCE

Our reversible composite decking offers a low-maintenance solution, designed to require minimal upkeep over its long lifespan. However, we believe a little regular care can go a long way in keeping your outdoor space looking its best.

The smoother surface of the non-grooved woodgrain finish is easier to clean, as it prevents dirt, mud, and grime from accumulating in grooves. That said, a simple brush of our grooved-finish boards will help prevent excessive build-up and keep them looking fresh and new. With just a little attention, both finishes will maintain their appearance and performance for years to come.

NON SLIP

Choosing the right non slip decking finish for you.

Our slip-resistant composite decking is designed with safety in mind, offering a range of anti-slip surfaces that ensure your outdoor flooring remains a safe place to play, entertain, and relax.

While no decking is completely slip-proof, we prioritize providing a level of slip resistance that ensures safety throughout the year. Our unique blend of composite materials helps inhibit the growth of algae and other slip hazards. Additionally, our reversible textured finishes offer long-lasting protection, giving you confidence that your deck will provide a safe and secure surface from day one

SLIP RESISTANCE AND MATERIAL FINISH

The slip resistance of your decking is primarily influenced by the texture of the board's finish. The grooved-channel side provides the highest traction underfoot, making it an ideal choice for areas where slip resistance is a priority. However, we've carefully engineered our woodgrain finish with a deep, textured surface and eliminated flat spots, ensuring it offers superior slip resistance compared to most other woodgrain finishes on the market.

SLIP RESISTANCE AND LAYING PATTERNS

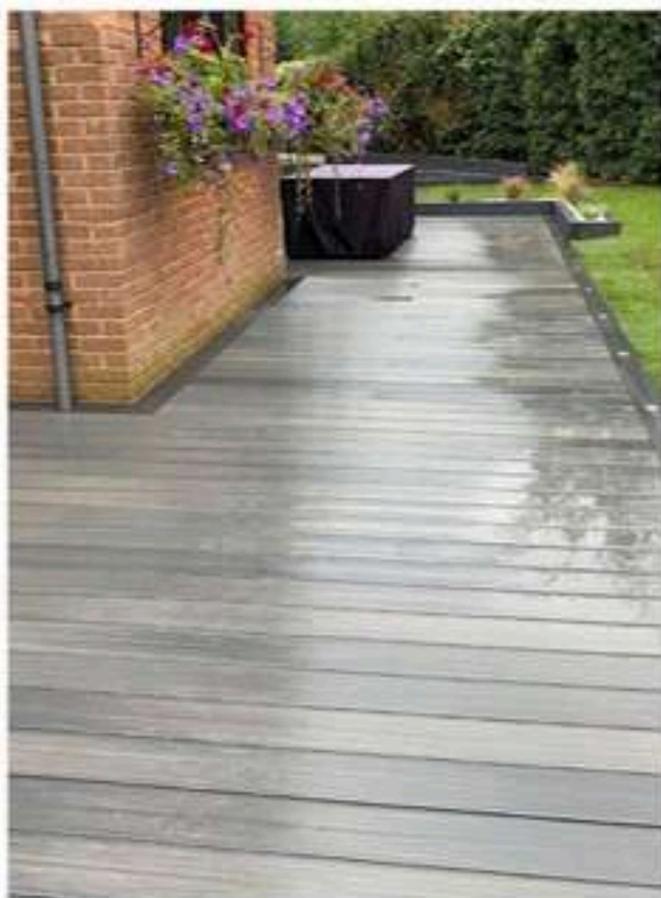

The direction in which decking boards are installed has a significant impact on their slip resistance. Our testing has shown a difference in performance between the longitudinal and horizontal orientations of the boards. For optimal slip resistance, we recommend installing the boards in alignment with the primary direction of foot traffic. This arrangement ensures enhanced traction and maximizes safety.

We advise customers to consider this factor during the pre-installation planning phase to ensure the best performance and safety outcomes for their decking project.

MOULD AND MILDEW RESISTANCE

In addition to the surface texture, the slip resistance of your decking is influenced by its ability to resist organic growth, such as algae, mould, and mildew. Over time, moisture buildup can encourage the growth of these substances, which not only makes the surface unsightly but can also compromise its slip resistance. Traditional materials, like timber, are particularly susceptible to this growth and can be difficult to fully clean.

The unique composition of our non-slip composite decking makes it resistant to mould and mildew, ensuring that the surface remains safe and slip-resistant throughout its lifespan. This provides peace of mind, knowing that the decking's performance and appearance will stay consistent over time.

FADE RESISTANT

Decking that's resistant to the effects weathering.

For many timber decking owners, fading is a common issue. Prolonged exposure to UV rays and rain causes the natural oils and pigments in timber to break down, resulting in a dull and weathered appearance over time. Even regular staining cannot fully prevent this.

Our fade-resistant decking is designed to maintain its look and finish, even after years of sun and rain exposure. By carefully engineering our boards with advanced UV inhibitors, they offer superior fade resistance compared to traditional timber. While the level of fade resistance varies across our ranges, the differences are outlined below to help you choose the best option for your needs.

OUR CAPPED COMPOSITE WEATHER RESISTANT DECKING

A key advantage of our capped composite weather-resistant decking boards is their exceptional fade resistance, designed to last throughout their lifetime.

Featuring an ultra-protective polymer shell, these boards offer superior resistance to weathering, safeguarding the oils and pigments within the core. The non-organic shell ensures a consistently high level of fade resistance, providing long-lasting durability and maintaining the board's appearance over time.

FIRE RATED

Our fire-rated composite decking complies with the industry standard for WPC products, achieving a Class C rating under EN 13501-1.

The importance of fire-rated building materials has never been greater, whether for new construction or renovation projects. That's why we are committed to keeping our customers informed about the quality standards our composite boards meet. We understand the critical need for safety and performance when specifying products for your projects.

To provide clarity, we explain what a fire rating entails and detail the meaning of a "Class C" rating under European standards. Additionally, we outline where our fire-rated composite decking can be installed in accordance with current building regulations, ensuring your peace of mind when selecting our products.

CLASSIFICATION	DEFINITION	DESCRIPTION
A1	Non-Combustibility	No contribution fire
A2	Limited Combustibility	No contribution fire
B	Combustible	Limited contribution fire
C		Minor contribution fire
D		Medium contribution fire
E		High contribution fire
F		Easy flammable

CLASS C FIRE-RATED COMPOSITE DECKING

Our Super Deluxe Composite Decking is classified as Class C under EN 13501-1, in line with the industry standard for wood composite products. Its full classification is "Cf-S1", indicating a high level of performance in terms of fire safety and smoke emission.

WHAT DOES THE "C" REPRESENT?

The "C" refers to the product's fire behavior, with a rating of "C" defined as a "minor contribution to fire".-

WHAT DOES THE "S" REPRESENT?

The "S" relates to smoke emission during combustion. An S1 classification indicates weak smoke emission—this is the highest rating available in this category.

ECO FRIENDLY

LONG-LASTING, ECO-FRIENDLY COMPOSITE DECKING

Our eco-friendly decking is crafted from recycled plastic and wood fibers, offering a sustainable and durable solution for your outdoor spaces. Each board is responsibly sourced, reflecting our commitment to minimizing environmental impact.

We understand that environmental causes are a top priority for our customers. As a responsible company, we are proud to align with these values by ensuring our eco decking products are designed to have as little impact on the environment as possible, without compromising on quality or longevity.

ENVIRONMENTALLY FRIENDLY DECKING

Our eco composite decking boards are made from responsibly sourced materials. For example, 100% of the plastic used is recycled, and the wood chippings we incorporate are repurposed materials that would otherwise end up in landfills.

By combining these recycled components, we create a sustainable base material for our environmentally friendly decking boards. What's more, this composite material is not only eco-conscious but also offers superior performance and durability compared to traditional alternatives.

BUILT FOR ENDURANCE

"Buy once, buy well" is our guiding principle. We want our customers to feel confident that choosing our products is an investment in durability and long-term satisfaction. For most homeowners, purchasing our eco-friendly decking is a once-in-a-lifetime decision, and we stand behind that with a 30-year warranty for our Super Deluxe series.

Our recycled decking boards are designed to endure. Unlike wood or plastic alternatives, they do not rust, splinter, warp, or split. They maintain their appearance and structural integrity for decades, significantly outlasting traditional options. By choosing our long-lasting decking, you reduce the need for frequent replacements, minimizing waste and contributing to a more sustainable future.

LOW MAINTENANCE

Our recycled composite decking boards require minimal upkeep. Simply clean them with soapy water, and you're good to go there's no need for harmful oils, stains, or paints. Enjoy a beautiful deck with far less effort and maintenance compared to traditional wood decking.

SAFETY

In addition to our commitment to the environment, we also prioritize the health and well-being of our workforce. We provide a safe, supportive, and progressive working environment where team members are valued, their welfare is supported, and they are continually encouraged to upskill and grow professionally.
